Let's all discuss next week before any further outreach to Jane. Jane had already shared The maps with alexis. I thought I had forwarded them. But maybe not.

I think dtsc is looking at some of these sites already.

Hi Enrique, Clancy and John,

I wanted to let you know that after the Groundwater Convening Jane Williams pulled me aside and told me that she talked to Alexis last week after the Exide public meeting to engage her to discussions about Superfund getting involved at Exide. She then showed me a map of several other smelters surrounding Exide that she would want Superfund to take a look at, she said that she plans on sharing this with Alexis as well. I wanted to let you know that I plan on sending the attachment from Jane to the site assessment team to evaluate for further action and coordinate with.

Harry in removal if any of them are of that caliber. After it is evaluated by site assessment and removal if appropriate, we will brief on the next steps. Please let me know if there are any concerns. I will respond back to Jane after I hear back from you and let her know that I have received her list and will evaluate it for next steps.

Thank you,

Mindy Cherng Clements, EPA R9 SFD Brownfields & Site Assessment, 415-972-3169 (w)
